Hyperfine, Inc. Celebrates ASNR 2024

May 22, 2024

The 2024 ASNR Annual Meeting had a strong focus on Alzheimer's disease care and growing excitement about ultra-low-field MRI

LAS VEGAS--(BUSINESS WIRE)--May 22, 2024-- Hyperfine, Inc. (Nasdaq: HYPR), the groundbreaking health technology company that has redefined brain imaging with the first FDA-cleared portable magnetic resonance (MR) brain imaging system—the Swoop® system—today announced that the company participated in the American Society of Neuroradiology (ASNR) 2024 Annual Meeting held in Las Vegas between May 18–22, 2024. This event featured several sessions showcasing the unique capabilities of the Swoop® Portable MR Imaging® system. There was significant additional focus on the importance of MRI in the care of Alzheimer's patients—an area of great opportunity for portable MR imaging.

Highlights from the 2024 ASNR Annual Meeting include:

- Ultra-low-field, portable MR brain imaging was featured as a high-potential technology that could have significant diagnostic impact across many disease states.
- Pioneering users of the Swoop® system showcased their clinical experience and workflow implementation in their centers.
- The substantial need for Alzheimer's treatment-related MRI and the gap in the ability to support that need with current diagnostic capacity was reinforced multiple times on the podium.
- Several educational sessions focused on the use of MRI for monitoring amyloid-related imaging abnormalities (ARIA) and the importance of diagnosing ARIA to ensure the safe deployment and continuation of Alzheimer's treatments.

"In my over 30 years of experience as a senior member of the ASNR, I have never seen such excitement and trepidation in the neuroradiology community in the care of specific disease states. The enthusiasm shown by my fellow neuroradiologists for the diagnosis and management of Alzheimer's disease was overwhelming, as was the concern for how this can be handled with the current imaging infrastructure. By bringing ultra-low-field, portable MR brain imaging into the neuroradiology armamentarium, attendees immediately saw the significant potential benefit of this technology in the care of these patients," said Edmond Knopp, MD, Vice President of Medical Affairs at Hyperfine, Inc.

About the Swoop® Portable MR Imaging® System

The Swoop® Portable MR Imaging® system is U.S. Food and Drug Administration (FDA) cleared for brain imaging of patients of all ages. It is a portable, ultra-low-field magnetic resonance imaging device for producing images that display the internal structure of the head where full diagnostic examination is not clinically practical. When interpreted by a trained physician, these images provide information that can be useful in determining a diagnosis. The Swoop® system also has CE certification in the European Union and UKCA certification in the United Kingdom. The Swoop® system is commercially available in a select number of international markets.

About Hyperfine, Inc.

Hyperfine, Inc. (Nasdaq: HYPR) is the groundbreaking health technology company that has redefined brain imaging with the Swoop® system—the first FDA-cleared, portable, ultra-low-field, magnetic resonance brain imaging system capable of providing imaging at multiple points of care. The mission of Hyperfine, Inc. is to revolutionize patient care globally through transformational, accessible, clinically relevant diagnostic imaging. Founded by Dr. Jonathan Rothberg in a technology-based incubator called 4Catalyzer, Hyperfine, Inc. scientists, engineers, and physicists developed the Swoop® system out of a passion for redefining brain imaging methodology and how clinicians can apply accessible diagnostic imaging to patient care. Forward-Looking Statements

This press release includes "forward-looking statements" within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. Actual results of Hyperfine, Inc. (the "Company") may differ from its expectations, estimates and projections and consequently, you should not rely on these forward-looking statements as predictions of future events. Words such as "expect," "estimate," "project," "budget," "forecast," "anticipate," "intend," "plan," "may," "will," "could," "should," "believes," "predicts," "potential," "continue," and similar expressions (or the negative versions of such words or expressions) are intended to identify such forward-looking statements. These forward-looking statements include, without limitation, the Company's goals and commercial plans, the benefits of the Company's products and services, and the Company's future performance and its ability to implement its strategy. These forward-looking statements involve significant risks and uncertainties that could cause the actual results to differ materially from the expected results. Most of these factors are outside of the Company's control and are difficult to predict. Factors that may cause such differences include, but are not limited to: the success, cost and timing of the Company's product development and commercialization activities, including the degree that the *Swoop*® system is accepted and used by healthcare professionals; the impact of COVID-19 on the Company's business; the inability to maintain the listing of the Company's Class A common stock on the Nasdaq; the Company's inability to grow and manage growth profitably and retain its key employees; changes in applicable laws or regulations; the inability of the Company to raise financing in the future; the inability of the Company to obtain and maintain regulatory clearance or approval for its products, and any related restrictions and limitations of any cleared or approved product; the inability of the Company to identify, in-license or acquire additional technology; the inability of the Company to maintain its existing or future license, manufacturing, supply and distribution agreements and to obtain adequate supply of its products; the inability of the Company to compete with other companies currently marketing or engaged in the development of products and services that the Company is

currently marketing or developing; the size and growth potential of the markets for the Company's products and services, and its ability to serve those markets, either alone or in partnership with others; the pricing of the Company's products and services and reimbursement for medical procedures conducted using the Company's products and services; the Company's estimates regarding expenses, revenue, capital requirements and needs for additional financing; the Company's financial performance; and other risks and uncertainties indicated from time to time in Company's filings with the Securities and Exchange Commission, including those under "Risk Factors" therein. The Company cautions readers that the foregoing list of factors is not exclusive and that readers should not place undue reliance upon any forward-looking statements, which speak only as of the date made. The Company does not undertake or accept any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements to reflect any change in its expectations or any change in events, conditions or circumstances on which any such statement is based.
